Marco A. Rivera Puga, Resident Agent  
860 Carmen Harnandez St.  
El Comandante, San Juan PR  
San Juan, PR 00924

The Roosevelt Road Development Corporation (RRDC) would like to invite you to become a sponsoring member of the “MILLION LANDFILL MARCH”. The RRDC in cooperation with Mr. Andrew J. Cipollo, the irrevocable trustee, of the Howard Hughes’, Atlas Monetary International Trust, (AMIT) ([www.harnessingthegrid.com](http://www.harnessingthegrid.com)) is announcing the initial release of ten million ounces of silver for sale to become a sponsor of the “MILLION LANDFILL MARCH”.

Mr. Howard Hughes, through his vision, arranged for the use of some of his wealth and technological resources to be used for the benefit of the people of the world and the protection of the environment. This program was to have begun in the year 2000 on the island of Puerto Rico. Because of the greed of some key individuals and the untimely death of other key and trustworthy people, the launching of the project has been delayed until now. This project will bring thousands of jobs and worldwide recognition to the island, as the program spreads around the world.

Mr. Cipollo has explained that the “MILLION LANDFILL MARCH” will be the catalyst to launch Mr. Howard Hughes’ vision to use landfills as the anchor for recycling. By becoming a sponsor, a person will be grandfathered in and able to take advantage of the benefits that the program offers. Some of those benefits include: they will be able to buy silver for \$10.00 an oz., gold for \$1000.00 an oz., and able to buy electricity at a reduced rates from the facility they are helping to develop. Sponsorship will also allow a person to sponsor others that want to

become citizens of the country where the landfill projects are located. Sponsorship will allow for membership in the Triple Crown Membership program that will allow members to receive health care coverage and enjoy participation in a retirement plan. Thousands of jobs, with a minimum of \$15.00 an hour, will be created from the development of each project phase.

As an example, an initial sponsoring of \$20.00, \$5.00 will go to the Government Development Bank of Puerto Rico (GDB) in order to open an account and issue the support card in the sponsor's name. The balance of \$15.00 is designated to cover the operation and cost of the project.

The first project that will launch the "MILLION LANDFILL MARCH" around the world will be the 200 acre landfill at Roosevelt Roads (formerly the USA Navel Base) at Cieba, Puerto Rico. With thirty-two other landfills on the island to follow, these projects will sponsor thousands of \$15.00 an hour jobs for people of Puerto Rico. After three years of employment, these jobs will provide a path for health care and the building of a retirement plan. In addition, the price of electricity will drop throughout the island, which will benefit all the people and businesses of Puerto Rico.

AMIT's objective is to provide this program throughout the world. The 250 acre landfill at Casmalia, California, which is north of Los Angeles, is now also being considered for participation. It is our hope to help sponsor 11 million Latinos with jobs and thus a potential path to citizenship and three years in the future, a path to paid health care.

We are looking forward to working with you to improve the lives of the people of Puerto Rico and the world.

Sincerely Yours

Randall D. Uselman, President
